Cateye strada slim wireless installation

Smooth, Sleek & Slimmed down - like the riders and bikes it's designed for. Features Analog wireless Pace arrow Dual tire size Customizable display ClickTec™ button interface Programmable odometer Menu screen to change setting Sensor battery alarm Slim sensor mounting inside front fork Low profile bracket Functions Current / average / maximum speed Trip distance 1 & 2 Elapsed time Clock Tech Specs Current speed 0.0(4.0)~105.9km/h Total distance 0.0~9999.9/10000-99999km [mile] Elapsed time 0:00'00"~99:59'59" Trip distance 0.00~999.99 km Maximum speed 0.0(4.0)~105.9km/h Wireless transmission Speed Clock 0:00'~23:59' [1:00'~12:59'] Pace arrow Yes Auto power saving Yes Auto start/stop Yes Sleep mode Yes Dual tire size Yes Odometer manual set Yes Tire size 0100mm~3999mm (default: 2096mm) Battery Computer: CR1616 X1, Sensor: CR2032 X1 Battery life Computer: approx 1 year (1hr use per day). Sensor: approx 10,000 km [6,250 miles] in total distance Dimension 47 X 32.0 X 12.5 mm Weight approx 12 grams * The factory-loaded battery life might be shorter than the specification above. * Design and specifications are subject to change without notice. STRADA SLIM CC-RD310W ENG 1 Before using the computer, please thoroughly read this manual and keep it for future reference. Please visit our website, where detailed instructions with movies are available and the instruction manual can be downloaded. Warning / Caution • Do not concentrate on the computer while riding. Ride safely! • Install the magnet, sensor, and bracket securely. Check these periodically. • If a child swallows a battery, consult a doctor immediately. • Do not leave the computer in direct sunlight for a long period of time. • Do not disassemble the computer. • Do not drop the computer to avoid malfunction or damage. • When you press the MODE button with the computer installed to the bracket, press around the dot section on the surface of the computer. Pressing strongly the other section may result in malfunction or damage. • When cleaning the computer, bracket and sensor, do not use thinners, benzene, or alcohol. • Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to local regulations. • LCD screen may be distorted when viewed through polarized sunglass lenses. Wireless Sensor The sensor was designed to receive signals within a maximum range of 60 cm, to reduce chance of interference. When adjusting the wireless sensor, note the following: • Signals cannot be received if the distance between the sensor and the computer is too large. • The receiving distance may be shortened due to low temperature and exhausted batteries. • Signals can be received only when the back of the computer is facing the sensor. Interference may occur, resulting in incorrect data, if the computer is: • Near a TV, PC, radio, motor, or in a car or train. • Close to a railroad crossing, railway tracks, TV stations and/or radar base. • Using with other wireless devices, or some particular battery lights. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.Modifications The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by CatEye Co., Ltd. May void the user's authority to operate the equipment. Hereby, CATEYE Co., Ltd., declares that this CC-RD310W is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. This model comes with a sensor inspired by modern road bikes. It may not be used for bikes with a large space between the front fork and spoke.
